***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, 25-27, 41 and 42, drawn to methods for treating animal bedding, classified in class 71, subclass 15.
- II. Claims 23, 24, drawn to a bedding for animals, classified in class 424, subclass 76.6.
- III. Claims 28-40, drawn to a method of poultry farming, classified in class 514, subclass 557.

The inventions are distinct, each from the other, for the following reasons:

Inventions III, II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. The product of Group II is independent and distinct from both methods of farming and treating animal waste. The methods of Groups I and II are independent and distinct methods.

The Groups have acquired a separate status in the art by their recognized, divergent subject matter. The searches required for each Group are not co-extensive resulting in an undue burden to the Examiner. Each Group is capable of supporting a separate patent.

Restriction for examination purposes as indicated is proper.

Further, claims 1-22, 25-27, 41 and 42 are generic to a plurality of disclosed patentably distinct species comprising animals, as disclosed in the present specification.

Art Unit: 1614

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should Applicant traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that to be complete, the reply to this requirement must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Phyllis G. Spivack whose telephone number is 571-272-0585. The Examiner can normally be reached on 10:30 AM-7 PM.
